25843	High	Feb 4 2009	Pending	DHS All Orgs	Department of Human Services Victoria	Chris Andrews
TrakCare TS.8	Ben Rhodes	Large Journal Files			System	detail

25843 Description: [Send e-mail about this problem](#) [back to top](#)

Hi Folks,

We had an incident overnight with one of our production ENSEMBLE instances. The issue was that from about 2.50pm yesterday afternoon we had a journal file rollover approximately every 8 minutes (Ensemble is configured to roll-over when filesize hits 250KB & purge journal files after 3 days).

Our journal files/system for this instance filled to 100% at approximately 10.15pm and the system froze as it was instructed to do in this situation.

This morning I got the system back online by moving older journal files to another file system & forcing the system to restart. I have two outstanding concerns:

1. The console log indicates it cannot find what journal files to purge as it's looking for something dated 1st Feb. The journal file in question is one which was moved out to clear space. Will this error rectify itself over time because of the 'purge after 3 days' setting?
2. How can we determine what was going on to cause such a large volume of journal activity yesterday?

Regards,
 Chris.

Last Action 57 Advisor: Ben Rhodes Action Date: 24 Mar 2009 Action Time: 10:36PM
 Hi Mark:

How did the running of the fix go over the weekend?

Is there any further input required for this TRC? I have set to Pending waiting on feedback of if the problem is not resolved.

Thanks
 Ben
